

**REMARKS**

Reconsideration of this application is respectfully requested in light of the following remarks.

Each of claims 80 and 82 has been amended for reasons unrelated to patentability, including at least one of: to explicitly present one or more elements implicit in the claim as originally written when viewed in light of the specification thereby not narrowing the scope of the claim, to detect infringement more easily, to enlarge the scope of infringement, to cover different kinds of infringement (direct, indirect, contributory, induced, and/or importation, etc.), to expedite the issuance of a claim of particular current licensing interest, to target the claim to a party currently interested in licensing certain embodiments, to enlarge the royalty base of the claim, to cover a particular product or person in the marketplace, and/or to target the claim to a particular industry.

Claims 80, 82, and 84-93 are now pending in this application. Claims 80 and 82 are the independent claims.

**I. The Anticipation Rejection**

Claims 80, 82, 84-87, and 89-92 were rejected as anticipated under 35 U.S.C. §102(e). In support of the rejection, Sexton (U.S. Patent No. 5,978,593) was cited. This rejection is respectfully traversed.

Sexton fails to establish a prima facie case of anticipation. See MPEP 2131. To anticipate expressly, the “invention must have been known to the art in the detail of the claim; that is, all of the elements and limitations of the claim must be shown in a single prior art

reference, arranged as in the claim”. *Karsten Mfg. Corp. v. Cleveland Golf Co.*, 242 F.3d 1376, 1383, 58 USPQ2d 1286, 1291 (Fed. Cir. 2001). The single reference must describe the claimed subject matter “with sufficient clarity and detail to establish that the subject matter existed in the prior art and that its existence was recognized by persons of ordinary skill in the field of the invention”. *Crown Operations Int’l, LTD v. Solutia Inc.*, 289 F.3d 1367, 1375, 62 USPQ2d 1917, 1921 (Fed. Cir. 2002). Moreover, the prior art reference must be sufficient to enable one with ordinary skill in the art to practice the claimed invention. *In re Borst*, 345 F.2d 851, 855, 145 USPQ 554, 557 (C.C.P.A. 1965), *cert. denied*, 382 U.S. 973 (1966); *Amgen, Inc. v. Hoechst Marion Roussel, Inc.*, 314 F.3d 1313, 1354 (Fed. Cir. Jan. 6, 2003) (“A claimed invention cannot be anticipated by a prior art reference if the allegedly anticipatory disclosures cited as prior art are not enabled.”)

Specifically, claims 80 and 82, from which claims 84-93 depend, recite “a **customized function call** adaptable to become a part of the operating system of said programmable logic controller”. **Please see** at least pages 44-45 of the application for an exemplary utilization of a “function call”.

Sexton does not teach “a **customized function call** adaptable to become a part of the operating system of said programmable logic controller”, nor any type of “**customized function call**”. Instead, Sexton allegedly recites that “[p]rogrammable bus interface unit 120 exhibits the very desirable capability of being able to **map communications** among the host PLC 105, micro field processor 150 and I/O modules 155. See col. 3, lines 45-48. Sexton’s Table 1 allegedly identifies this mapping of communications.

Accordingly, it is respectfully submitted that the rejection of claims 80 and 82 is unsupported by Sexton and should be withdrawn. Also, the rejection of claims 84-93, each

ultimately depending from one of independent claims 80 or 82, is unsupported by Sexton and should be withdrawn.

## II. The Obviousness Rejection

Claims 88 and 93 were rejected under 35 U.S.C. § 103(a) as being unpatentable over Sexton (U.S. Patent No. 5,978,593). This rejection is respectfully traversed.

Sexton does not establish a *prima facie* case of obviousness. “To establish a *prima facie* case of obviousness, three basic criteria must be met. First, there must be some suggestion or motivation, either in the references themselves or in the knowledge generally available to one of ordinary skill in the art, to modify the reference or to combine reference teachings. Second, there must be a reasonable expectation of success. Finally, the prior art reference (or references when combined) must teach or suggest all the claim limitations. The teaching or suggestion to make the claimed combination and the reasonable expectation of success must both be found in the prior art, and not based on applicant’s disclosure.” See MPEP § 2143.

As discussed above, claims 80 and 82, from which claims 84-93 depend, recite “a **customized function call** adaptable to direct said programmable logic controller”.

Consequently, Sexton does not teach or suggest all of the claim limitations, and thus does not establish a *prima facie* case of obviousness. Reconsideration and withdrawal of the rejection is respectfully requested.

**REPLY UNDER 37 C.F.R. 1.116**

**EXPEDITED PROCEDURE**

**EXAMINING GROUP 2182**

**PATENT**

**SERIAL NO. 09/732,574**

**CONCLUSION**

It is respectfully submitted that, in view of the foregoing amendments and remarks, the application as amended is in clear condition for allowance. Reconsideration, withdrawal of all grounds of rejection, and issuance of a Notice of Allowance are earnestly solicited.

The Office is hereby authorized to charge any additional fees or credit any overpayments under 37 C.F.R. §1.16 or §1.17 to Deposit Account No. 50-2504. The Examiner is invited to contact the undersigned at 434-972-9988 to discuss any matter regarding this application.

Respectfully submitted,

Michael Haynes PLC
